Student pursuing a degree in Cybersecurity, passionate about network security, and seeking an Cybersecurity Internship. Proficient in tools such as Nmap, Burp Suite, Metasploit, Nessus, and Kali Linux, with hands-on experience in OWASP Top 10 vulnerabilities and Active Directory attacks.

EDUCATION

University of Arkansas - Pulaski Technical College

Associate of Science in Technology and Engineering

August 2023 - May 2025

University of Arkansas of Little Rock

Bachelor of Science in Cybersecurity

January 2026

AWARDS AND CERTIFICATES

- TCM - Practical Junior Penetration Test Certification
- TCM - Practical Help Desk Associate Certification
- CompTIA Security+ SY0-701 Certification
- University of Arkansas – Pulaski Technical College: Computer Information Systems Certificate of Proficiency
- TCM - Practical SOC Analyst Associate Certification

SKILLS

- Security Tools: Nmap, Burp Suite, Metasploit, Nessus, Hydra, Remote Desktop, Virtual Machines (VirtualBox).
- Security Techniques: Penetration Testing, Vulnerability Assessment, OWASP Top 10, Active Directory Pentesting, System Hardening
- Operating Systems: Windows (Windows 10, 11, and Server 2019) and Linux (Kali)
- Technical Skills: PC Building, System Configuration, Troubleshooting, Active Directory Configuration
- Scripting & Programming: Python, Bash, SQL, C#

WORK EXPERIENCE

Dollar General Sales Associate (Stocker):

June 2023 - present

- Maintained accurate inventory and ensured product assembly quality
- Stocked, rotated, and displayed merchandise according to company standards
- Provided excellent customer service and assistance as needed
- Supported a clean, organized, and safe store environment
- Unloaded deliveries and assisted with storeroom organization

PROJECTS / LABS

- Integrated Lab Environment: Kali / Metasploitable / Windows AD
 - Built and managed an isolated lab combining a Kali attack VM, Metasploitable target, and Windows Active Directory.
 - Performed authorized reconnaissance, exploitation, privilege escalation, lateral movement, and hardening exercises.
- Python Port Scanner
 - Developed a script to scan TCP ports (0–65535) across single or multiple hosts, reporting open ports with probable service identifications.
- Python File Searcher
 - Created a script that searches current and subdirectories for files and enables view/modify/delete operations with user confirmation.
- Python Login Bruteforcer
 - Implemented a brute-force testing tool that automates username/password attempts against a login endpoint using a supplied wordlist (for authorized testing only).
